Hui Yang

github.com/huiyang-astro

I am interested in stellar remains, including neutron stars, (Galactic and supermassive) black holes, and accreting binaries, and studying them using multiwavelength data and methods like machine learning classifications.
I am currently a PhD candidate in the Physics Department at The George Washington University.

Education

PhD in Physics, *George Washington University (GWU)* Expected April 2024
Master in Astrophysics, *University of Chinese Academy of Sciences* 2015.09 – 2018.06
Bachelor in Astronomy, *Nanjing University* 2011.09—2015.06

Research Experience

Research Assistant *GWU, Washington, D.C., Sept. 2019- Now*

- Galactic archaeology: searching for compact objects and extreme particle accelerators with machine learning analysis of multiwavelength catalogs Supervisor: Prof. Oleg Kargaltsev

Research Assistant *NAOC, Beijing, China, Sept. 2016- May 2018*

- X-ray and Gamma-ray Study of Relativistic Jets in a Radio Loud Narrow-Line Seyfert 1 Galaxy Supervisor: Prof. Weimin Yuan

Research Assistant *SHAO, Shanghai, China, Feb. 2015 - June 2015*

- Studying Properties of Outflows From Hot Accretion Flows Using Trajectory Approach Supervisor: Prof. Feng Yuan

Summer Research *NAOC, Beijing, China, Aug. 2014*

- Black Holes and Their Radio Radiation Supervisor: Prof. Jinlin Han

Exchange Project *University of Sydney, Sydney, Australia, June - July 2014*

- Measuring the Rotation Curve of the Galaxy with the Small Radio Telescope Supervisor: Prof. Richard Hunstead

Practical Experiment *NJU, Nanjing, China April - Aug. 2013*

- Building A Dipole Radio Antenna and Observing the Sun Supervisor: Dr. Zhixin Peng

Term Project *NJU, Nanjing, China, Oct. 2012- Oct. 2013*

- Coronal Bright Points: a Precursor of CMEs and Their Automated Detection Supervisor: Prof. Pengfei Chen

Proposals

Bright X-ray Counterparts of Galactic 4FGL Sources (PI) XMM-Newton AO-23 #094258
Exploring the nature of PeVatron Candidate HESS J1702-420A (PI) Chandra Cycle 25 #25500393
Hunting for IMBHs in the Omega Centauri Globular Cluster (Co-I) JWST Cycle 2 #4343
The radio structure of SDSS J2118-0732, a newly identified gamma-ray NLS1 (Co-I) VLBA

+1 (202) 290-8683

SELECTED PRESENTATIONS

Classifying Serendipitous X-ray Sources from Chandra Source Catalog using Machine Learning, March 2023, HEAD20
Compact Objects/SNRs Science with AXIS, March 2023, HEAD20 (invited)
Hands-on tutorial of machine learning classification with Chandra Source Catalog version 2.1, March 2023, HEAD20 (invited)
Multiwavelength Classification with Machine Learning: using VLASS to improve X-ray source classifications, Sept 2022, Socorro NM
Machine Learning Classification of Variable Galactic X-ray Sources from Chandra Source Catalog, Yang, H., et al., April 2022, HEAD19
Classifying X-ray Sources Using Machine Learning, June 2021, 238th AAS meeting, online
Role of Temporal Features in Machine-Learning Classification of X-ray Sources based on Chandra Source Catalog v2, Oct. 2020, Chandra Frontier in Time-Domain Science Conference, online
On the multiwavelength properties of several γ-ray detected narrow-line Seyfert 1 galaxies, April 2018, Padova, Italy
SDSS J2118-0732: a new γ-ray-emitting narrow-line Seyfert 1 galaxy, Dec. 2017, 7th Fermi Asian Network Workshop, Lijiang, China

Supervising Experience

- 2023 Yichao Lin (GWU, grad) — Machine Learning Classifications with XMM-Newton Source Catalog
  Co-supervised with Prof. Kargaltsev
- 2020–2021 Caden Gobat (GWU, undergrad) — Catalog of X-Ray Detected Be Stars (XDBS)
  Co-supervised with Prof. Kargaltsev
- 2020 Aidan Smith (high-school student) — Testing Various Machine Learning Algorithm with MUWCLASS
  Co-supervised with Prof. Kargaltsev

Teaching/Outreach

- 2020 Spring, Teaching Assistant with Dr. L.A Correa Borbonet — Astronomy 1001
- 2019 Fall, Teaching Assistant with Dr. George Younes — General Physics II
- 2019 Spring, Teaching Assistant with Dr. Jha — University Physics
- 2018 Fall, Teaching Assistant with Prof. O'Donnel — Stars, Planets and Life in the Universe

Training/Development

Data Science Graduate Certificate — Columbian College of Arts & Sciences, GWU
Fermi Summer School — Lewes, Delaware, May, 2023
Statistics for Astronomers Summer School — Center for Astrostatistics, PSU, June, 2021
Radio Analysis Workshop — UMBC, Maryland, June, 2019
Gravitational Wave and LIGO Detector Mini School — Beijing, China, Sep., 2016
Pulsars searching & timing and SKA Science Summer School — Kunming, China, Aug., 2015
Pulsar Astrophysics Summer School — NAOC, Beijing, China, Aug, 2013

TECHNICAL Skills

General skills	Data visualization, Machine Learning, Statistical Modeling
Progamming Languages	Python, IDL, Java, Shell, ADQL
Data Analysis	Chandra, XMM-Newton, Fermi-LAT
Languages	English (working efficiency), Chinese (native)
